PROFESSIONAL EXPERIENCE

Appstango

Software/AI Engineer (Contract)

Remote

April 2026 – Present

- Built AEO visibility monitoring and reporting across ChatGPT, Gemini, Microsoft Copilot, and Google, with rank-quality controls and evidence capture
- Engineered geo-targeted mobile proxy and VPN workflows using residential proxy routing, GOST/SocksDroid tunneling, session rotation, DNS health checks, exit-IP validation, and location alignment
- Built and operated Android device-fleet automation: ADB/mDNS provisioning, self-healing watchdogs, remote recovery, health monitoring, and scalable job dispatch
- Integrated and customized scrcpy-based audio capture for voice-search automation, including virtual-microphone routing, deterministic speech injection, transcript validation, and CAPTCHA-aware result handling

Center Court Capital

Full Stack Developer (Contract)

Remote

May 2026 – September 2026

- Built ticket-market monitoring and secondary-listing matching workflows with typed polling, section normalization, fuzzy matching, and filter UI integration
- Created Playwright capture workflows and reproducible market-data research across multiple venue types
- Added unit and integration coverage for matching, polling, and data-quality safeguards

SparkSoft Solution, Inc.

Software Engineer

Remote

June 2024 – April 2026

- Architected and deployed a full-stack attendance management system using Next.js 14, TypeScript, and AWS Amplify, successfully supporting 15,000+ employees.
- Engineered real-time biometric hardware integrations and automated data export pipelines, reducing HR administrative processing time by 75%.
- Developed a high-performance enterprise analytics dashboard featuring geofenced tracking and multi-format reporting for workforce optimization.
- Hardened system security by building a Node.js/Express backend with AES-encrypted QR decryption, GraphQL integration, and a secure S3 proxy for sensitive data

GuestPuls

AI/Analytics Engineer (Contract)

Remote

Dec 2025 – Feb 2026

- Developed a sophisticated AI hotel analytics assistant using Next.js 15 and PostgreSQL that translates natural language into complex SQL queries and real-time visualizations.
- Designed a 3-level deterministic routing engine with O(1) keyword indexing and fuzzy matching, accurately classifying queries across 7 specialized handlers for 4 distinct hotel datasets.
- Integrated an LLM layer (Ollama/OpenAI) to provide context-aware reasoning, automated narrative insights, and proactive follow-up suggestions.
- Built a semantic catalog with O(1) keyword indexing, fuzzy matching, typo detection, and 17 paraphrase patterns for natural language understanding

MindScript Technologies LLC

Full Stack Developer (Contract)

Remote

Sept 2025 – Nov 2025

- Engineered a specialized medical consultation platform integrating Claude LLM, designing complex system prompts and deterministic logic flows to guide AI behavior for over 100+ healthcare consultants Agent.
- Developed and managed high-performance endpoints using Python (FastAPI), ensuring rapid data retrieval and seamless communication between the LLM and the frontend.
- Implemented global localization features, enabling the AI and platform to support multiple languages for diverse patient-consultant interactions.
- Refactored a legacy React.js codebase, transforming "spaghetti code" into a clean, modular architecture, which significantly improved maintainability and reduced bug reports

TECHNICAL SKILLS

Programming Languages: Python , Node, C++, JavaScript, Typescript, FastAPI, PHP, HTML/CSS, C++,
Technologies/Frameworks: React.js, Next.js, REST APIs, Git, AWS Amplify, S3, Postgres, DynamoDB, Playwright, Android Automation, ADB, scrcpy, Mobile Device Fleet Operations, Proxy Infrastructure, Residential Proxies, VPN/Tunneling, GOST, SocksDroid, Network Diagnostics, Chrome DevTools Protocol (CDP), Geo-targeted Testing
AI/ML: OpenAI API, Ollama, LLM Integration, NLP, Claude, Codex, HuggingFace, OpenCV, YOLOv8

EDUCATION

Western Mindanao State University

Bachelor's, Computer Science

August 2020 - May 2024

Zamboanga City, Ph.

- Academic award, Best in Portfolio
- OOP, Data Structures, Algorithm, Software Engineering, Database System,

PROJECTS

GuestPulse – AI Analytics Assistant | TypeScript, Next.js 15, PostgreSQL, Ollama, OpenAI, Recharts, Vitest

AI Developer

- Engineered a natural language-to-SQL engine that enables non-technical users to query 4 distinct hotel datasets via an intuitive chatbot interface.
- Optimized query performance by implementing a semantic catalog with O(1) keyword indexing and 17 unique paraphrase patterns for robust intent detection
