EDUCATION

Western Mindanao State University	August 2020 – May 2024
Bachelor of Science in Computer Science	Zamboanga City, Philippines
- Academic Award: Best in Portfolio - Coursework: OOP, Data Structures & Algorithms, Software Engineering, Database Systems, AI/ML	

PROFESSIONAL EXPERIENCE

SparkSoft Solution, Inc.	Remote
Software Engineer	Jun 2024 – Apr 2026
- Architected and deployed a Next.js, TypeScript, and AWS Amplify attendance platform supporting 15,000+ employees. - Integrated biometric hardware and automated data-export pipelines, reducing HR processing time by 75%. - Built enterprise analytics and secure Node.js/Express services for AES-encrypted QR verification, GraphQL integration, and protected S3 delivery.	
SignalAEO	Remote
Software Engineer (Contract)	May 2026 – Present
- Built AEO visibility monitoring and reporting across ChatGPT, Gemini, Microsoft Copilot, and Google, with rank-quality controls that prevent misleading claims. - Developed Android device-fleet and voice-search workflows with health checks, tunnel recovery, job routing, and search-result evidence capture. - Delivered role-scoped client and admin dashboards, readable reports and exports, Stripe billing flows, and email lifecycle tracking.	
Center Court Capital	Remote
Software Engineer (Contract)	May 2026 – Aug 2026
- Built ticket-market monitoring and secondary-listing matching workflows with typed polling, section normalization, fuzzy matching, and filter UI integration. - Created Playwright capture workflows and reproducible market-data research across multiple venue types. - Added unit and integration coverage for matching, polling, and data-quality safeguards.	
GuestPulse	Remote
AI/Analytics Engineer (Freelance)	Dec 2025 – Feb 2026
- Developed an AI hotel analytics assistant using Next.js and PostgreSQL that translates natural-language questions into SQL queries and real-time visualizations. - Designed deterministic query routing and integrated Ollama/OpenAI for context-aware insights, follow-up suggestions, and natural-language understanding. - Built a semantic catalog with keyword indexing, fuzzy matching, typo detection, and paraphrase patterns for reliable intent detection.	
MindScript Technologies LLC	Remote
Full Stack Developer (Freelance)	Sept 2025 – Nov 2025
- Engineered a medical consultation platform using Claude LLM, structured prompts, and deterministic flows for healthcare-consultant workflows. - Built FastAPI endpoints and multilingual platform features for fast data retrieval and clear AI/frontend communication. - Refactored a legacy React.js codebase into a cleaner modular architecture that improved maintainability.	
Independent	Remote
Technical SEO & AEO Web Developer	Oct 2025 – Jul 2026
- Improved a Next.js local-service website with canonical metadata, Open Graph data, and ChildCare JSON-LD. - Shipped sitemap/robots routes, Search Console verification, analytics, and image/content optimization.	

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, Python, Node.js, PHP, HTML/CSS, SQL, FastAPI
Technologies/Frameworks: React.js, Next.js, REST APIs, AWS Amplify, S3, PostgreSQL, DynamoDB, MySQL, GraphQL, Playwright, Vitest
AI/Developer Tools: OpenAI API, Claude Code, OpenAI Codex, Ollama, LLM Integration, NLP, Prompt Engineering, Git, GitHub, Android Automation, Stripe
